How to access Emoji’s on your computer

This guide will help you use your computers keyboard to post Emoji’s. Below are guides for both Windows and Mac users.

For a Windows computer

1. Click where you would like to begin typing
2. On the keyboard, press and hold the Windows button and either the full stop (.) or semicolon (;) button. The buttons you need to press look like this:

![Keyboard Image]

You do not need to use both the full stop button and the semicolon button.

3. You should now see the Emoji picker. It should look something like this:

![Emoji Picker Image]

4. Click any Emoji to add to the text area
For a Mac

1. Click where you would like to begin typing
2. On the keyboard, press and hold the Control, Command and Space buttons.
   The buttons you need to press look like this:

3. You should now see the Emoji picker. It should look something like this:

4. Click any emoji to add it to the text area.
