

# What are the grand challenges for Adult Social Care Research?

# Strengthen the Infrastructure

- Ability of Social Care System to support Research (WCCIS change now important)
- Local & National Ability to extract and use to support individual practitioners research
- Employ more roles at local levels which encourage use of “evidence based research” ie Consultant Social Worker roles

# Value its importance

- Current context and why Research is crucial. (Demography and pressures)
- Make the time- embrace current work ongoing, release practitioners to learn
- Increase awareness of research already published and use as an inspiration
- Support SCW goals and progress them in our organisations

# Understand how to make it work for us & change practice

- Human Learning Systems
- Story Telling
- Take complex Learning & make it easy to understand
- Use quantitative data wisely
- Value knowledge and experience of practitioners and people who use social care

# Embedding & Making it happen

- Risk taking with governance in place
- Disrupt
- Adopt or Justify Approaches.
- Learn from Other
